The Ed100 ADA Sign Series complies with all federal specifications outlined in Title III, Section 4.3 of the American with Disability Guidelines (ADAAG). This system was designed for vandal prone environments by incorporating sub-surface color substrates, chemically welded recessed letters, Raster®, Braille, and a non-glare, scratch resistant finish.

### Warranty

**Limited Lifetime Warranty**
The manufacturer warrants this product for materials and craftsmanship for the intended lifetime of the product (in the building it was originally installed). We offer a full Lifetime Warranty on text delamination. Please call for a complete warranty disclaimer.

### Process

**Chemically Welded and Recessed Letters**
Signs fabricated from Modified Acrylic Polymer (MAP) suitable for interior and exterior use. Raised letters and symbols are recessed 1/32” and chemically welded using methylene chloride forming an integral part of sign face. Grade II Braille achieved by inlaying optically correct acrylic Raster® beads into computer drilled holes.

### Materials

**Modified Acrylic Polymer**
- **Finish**: Matte / Non-Glare
- **Thickness**: 1/16” or 1/8”
- **Sheet Size**: 24” x 48”
- **Applications**: Interior / Exterior
- **Properties**: UV Stable, Scratch Resistant

**Corner / Edge Treatments**
- Rounded Edge (RE)
- Beveled Edge (BE)
- Square Edge (SE)
- Radius (RC) Corners
- Square (SC) Corners

1/8” Modified Acrylic Polymer (MAP)
1/16” Characters are recessed and chemically welded into the sign face using methylene chloride.
Optically correct acrylic Raster® beads inlaid into computer drilled holes.
